MEMO

TO: Parents, Guardians, and Bloomfield Community

FROM: Salvatore Goncalves, Superintendent

Good Morning,

We have received our testing results for lead levels in our drinking water from the Bloomfield Health Department. A total of fifty-six (56) samples were taken from all 14 sites within the district. All samples came back below the maximum contaminate levels allowed by state and federal regulations; with the exception, of a kitchen sink (not used for food preparation or child consumption) at the ECC and a drinking fountain at the Administration Building. The water fountain at the Administration Building has been shut down and will be removed. The kitchen sink at the ECC has been shut down and will be remediated at the recommendation of the Bloomfield Health Department.

These results indicate there is no public health threat. A copy of the results are available in the Business Administrators Office for review.

Thank you,
Salvatore Goncalves, Superintendent
